LIST OF CONTENTS

PREFACE ....................................................................................................................... iii
REPORT FROM ORGANIZING COMMITTEE ............................................................... iv
WELCOME ADDRESS ................................................................................................. v
OPENING REMARKS ................................................................................................. vi
LIST OF CONTENTS ..................................................................................................... vii

PART I

PLENARY SESSION

1. Asian livestock: Opportunities, challenges and the response
   Vinoj Ahuja .................................................................................................................. 1 – 5
2. Cattle extension programs and research for tropical agriculture
   Dale R. ZoBell ............................................................................................................ 6 – 10
3. The revolving fund system in sustainable community development
   Grant Davidson, and E.R. Ørskov ......................................................................... 11 – 18
4. Intensification of smallholder livestock production: Is it sustainable?
   Hendrik M.J. Udo and Fokje Steenstra .................................................................. 19 – 26
5. The development of Danish agriculture and agribusiness: Lessons to be learned in a
   global perspective
   Henning Otte Hansen and Mogens Lund ................................................................. 27 – 35
6. Genome research of gut bacteria, how to analyze and how to apply?
   Tohru Suzuki, Kouta Sakaguchi, and Kazumasa Yasui ......................................... 36 – 40
7. Animal production in Thailand: Challenges and potentials in global market
   Yanin Opatpanakit .................................................................................................... 41 – 49
8. Improvement of forage quality by means of molecular breeding in tropical grasses
   Takahiro Gondo, Genki Ishigaki, Yasuyo Himuro, Nafiutul Umami and Ryo Akashi
   ................................................................................................................................. 50 – 56
9. Advance research in function and healthy food from animal products – antihypertensive
   peptides derived from meat protein hydrolysates
   Michio Muguruma, Jamhari, Yuny Erwanto, and Satoshi Kawahara ................. 57 – 63

SUPPORTING PAPERS

Animal Feed and Nutrition

1. Exploration of pathogenic and non-Pathogenic Fungi on Alfalfa (Medicago sativa L)
   Turrini Yudianti, Sumarsono, and Didik Wisnu Widjajanto .................................. 64 - 67
2. Organic fertilizer application on performance and production of king grass in acid soil
   Sumarsono, Syafriul Anwar, Didik Wisnu Widjajanto, and Susilo Budiyanto .......... 68 - 71
3. The effect of using earthworm (Lumbricus rubellus) meal additives as growth promoters on protein digestibility and performance of intestinal villi
Hardi Julendra, Zuprizal, and Supadmo .......................................................... 72 – 78

4. Fermentation of Jatropha kernel cake (Jatropha curcas L.) using varieties of fungi on its chemical compositions, concentration of phorbol ester, and digestibility
Fatmawati, Hari Hartadi, and R. Djoko Soetrisno ................................................. 79 – 88

5. Effect of protected crude palm oil on rumen microbial activities and methane production
Nafly C. Tiven, Lies Mira Yusianti, Rusman, and Umar Santoso .................................. 89 – 94

6. Fermentation parameters and total gas production of some rumen protected fat-protein

7. Dietary energy utilization of Local Sheep fed complete feed consisting of agricultural and agroindustrial by-products

8. Reduction of phytic acid and aflatoxin content of rice bran through fermentation rhizopus spp. Combined with deproteinated-chitin waste addition
Ahmad Sofyan, Ema Damayanti and Hardi Julendra ............................................... 104 – 108

9. Implementation of fermented rice bran as flavor enhancer additive and its effect on feed utilization and cattle performance
L. Istriqomah, A. Febrisiantosa, A. Sofyan, and E. Damayanti .................................. 109 – 114

12. The use of kume grass (sorghum plucomus var. timorese) to substitute king grass (pennisetum purpureophyoides) fed on Bali Cattle in East Nusa Tenggara T.O. Dami Dato, S. Ghunu, M.A. Hilakore, J.J.A. Ratuwaloe, and Y.L. Henuk ........ 121 – 123

14. Effects of substitution of Elephant grass by corn waste and coffee pulp as basal diet on nutrient intake and digestibility in young male Ongole crossbred cattle Dicky Pamungkas, Ristianto Utomo, Nono Ngadyono, and Muhammad Winugroho ...... 129 – 134

15. Effect of lactic acid bacteria inoculants applications to the quality and chemical composition silage waste of carrot plant (Daucus carota) Badat Muwahid .............................................................. 135 – 140

16. The content of phytoestrogen on legume plants
Batseba M.W. Tiro, Suwijiyo Pramono, Hari Hartadi, Djoko Soetrisno, and Endang Baliarti ................................................................. 141 - 145

17. Chemical composition and digestibility(in vitro) of cocoa pod husk (Theobroma cocoa L.) Fermented with aspergillus niger
F.F. Munier, H. Hartadi, and I.G.S. Budisatria .......................................................... 146 – 154
18. Intake and digestibility of feed in lamb of Sumatera composite breed when the commercial concentrate diet were substituted by gliricidia dan rice bran
Dwi Yulistiani and Wisri Puastuti .......................................................... 155 – 158

19. Fermentative gas production of different feeds collected during wet and dry seasons when incubated with rumen fluid from Rusa Timor (Cervus timorensis)
M. S. Arifuddin, R. Utomo, H. Hartadi, and Damry ........................................ 159 – 164

20. Effect of complete feed plus on quality and milk production of dairy cow
Ristianto Utomo, B.P. Widyobroto, L.M. Yusianti, R.A. Rihastuti, S.P.S. Budhi,
and V.K. Dewi .................................................................................. 165 – 170

21. In Vitro gas production of fermented cacao pod (Theobroma Cacao) added with cellulosic inoculum from cattle rumen fluid
Chusnul Hanim, L.M. Yusianti, and V.P. Budyastuti ........................................ 171 – 176

22. Hibiscus Schizopetalus as saponin source, reduce protozoa number and increase microbial protein synthesis on in vitro sheep rumen fermentation
Asih Kurniawati and Nafiatul Umami .......................................................... 177 – 182

23. The effect of gliricidia or mixture of rice bran and copra meal supplementation on feed intake, digestibility and live weight gain of early weaned Bali Calves fed A, Mulato grass
Marsetyo, Muhammad Ilyas Mumu, and Yohan Rusiyantoro ................................ 183 – 188

24. A comparison of feeding management practices of beef cattle smallholders in lowland and upland sites in East Java

25. The effect of ketepeng cina leaf (cassia alata l), as a source of anthraquinone, methanogenesis inhibitor agent on rumen microbial protein synthesis for beef cattle in Sedyo Rukun farmer group
Lies Mira Yusianti, Zaenal Bachrudin, Chusnul Hanim, and Lila Indriana .................. 196 – 200

26. The effects of feed restriction severity on compensatory growth of goat kids in Bushehr Province, Iran
Mahmod Dashtizadeh, Azizollah Kamalzadeh, Mohammad Hadi Sadeghi, Amir
Arsalan Kamali, and Abdolmeid Kabirifard .................................................. 201 – 207

27. Fermentation quality of king grass (Pennisetum Purpureohoides) ensiled with epiphytic lactic acid bacteria and tannin of acacia
B. Santos, B. Tj. Hariadiil, H. Manik and H. Abubakar ......................................... 208 - 214

28. The effect of methionine on glutathion production to eliminate aflatoxin B1 toxicity
Yuniarta, Ali Agus, Nuryono, and Zuprizal .................................................... 215 – 220

29. Rice bran fermentation tecnology and soya bean oil supplementation of transfer protection fatty acid omega-3 of unsaturated fatty acids conten of milk dairy cow
Sudibya .................................................................................................. 221 - 226

30. Growth performance and blood profile of african cat fish fed sweet potato (ipomoea batatas) leaf meal
Olaniyi Christianah Oludayo ................................................................ 227 – 232

31. Application of complete feed formulated from agriculture by-products with undergraded protein supplementation on beef cattle productivity
Bambang Suhartanto, B.P. Widyobroto, I.G.S. Budisatri, Kustantinah, and R.
Utomo ...................................................................................................... 233- 238
32. The effect of green tea extract (*camellia sinensis*) supplementation on blood profiles and lipid oxidation in broilers fed high pufa diet
   **Isti Astuti, Supadmo, Sugeng Riyanto, Supriyadi** ........................................... 239 - 242

33. The role of lactic acid bacteria on silage duration process and rumen content silage quality
   **Isnandar, R. Utomo, S. Chuzaemi, E. Sutariningsih, and L.M. Yusiati** .......... 243 – 249

34. Replacing enzose by corn grains: impact on nutrients utilization and weight gain in growing buffalo calves
   **M.Nisa, M.Aasif Shahzad, and M.Sarwar** ........................................................ .......... 250 – 256

35. Nutrients utilization, nitrogen dynamics and weight gain in growing buffalo calves fed graded replacement of urea by corn steep liquor
   **M.Aasif Shahzad, M.Nisa, and M.Sarwar** ........................................................ .... 257 – 261

36. Production and nutritive value of mulberry hay as potential feed supplement for ruminants
   **Z.A. Jelan and A.R. Alimon** ................................................................. 262 – 265

37. The retention of copper in sheep fed palm kernel cake supplemented with molybdenum, molybdenum plus sulphur and zinc
   **A.R. Alimon, R.A. Al-kirshi and Z.A. Jelan** ................................................. 266 – 268

38. Utilization of complete feed based on fermented rice straw for Australian commercial cross steer on carcass and meat quality
   **Bambang Suwignyo, Ristianto Utomo, Yuny Erwanto and Ali Agus** .......... 269 – 273

39. The measurement of rate of passage using different pairs of alkane as markers for sheep fed hay or fresh grass
   **A. Kustantinah, R.W. Mayes, and E.R. Orskov** .............................................. 274 – 281

40. Aflatoxin ml excretion in the milk of tropical dairy cow fed contaminated aflatoxin b1 in the diet

**Poultry Production**

1. The interaction of dietary lysine and temperature on egg laying performance of broiler breeders
   **Abdulameer Al-Saffar** ......................................................................................... 286 – 290

2. Digestible methionine requirement for performance and carcass yield of broiler finisher
   **N.G.A. Mulyantini** ......................................................................................... 291 – 295

3. Resource use efficiency in poultry production in Bureti District, Kenya

4. *In vitro* evaluation of phytoecenic potential of seed from mango (*Mangifera indica*), moringa (*Moringa oleifera*) and sweet apple (*Annona squamosa*) for poultry
   **Rusdi, Asriani Hasanuddin, Rosmiaty Arief** .................................................. 303 – 307

5. The effect of adding vitamine C and E in native chicken semen extender storaged at temperature 4°C on semen quality and egg fertility
   **Widya Asmarawati, Ismaya, and Tri Yuwanta** .................................................. 308 – 313
6. The effects of single lactic acid bacteria probiotic supplementation on intestinal mucosa profile and immune response in broilers
Bambang Ariyadi and Sri Harimurti ................................................................. 314 – 319

7. Identification of single nucleotide polymorphism of gen insulin-like growth factor binding protein 2 on growth of native chicken
Sri Sudaryati, Jafendi HP Sidadolog, Wihandoyo, and Wayan Tunas Artama ........... 320 - 324

8. Cassava leaf meal inclusion in palm kernel meal diet could improve egg yolk color in post-molted native laying hens
Adrizal, S. Fakhri, R. Murni, Yatno, T. Maranata, S. Asby, Yusrizal, and C. R. Angel .............................................................. 325 – 331

9. Egg production responses of laying hens to feed medicinal herbs after peak of production

10. Systems of poultry husbandry
C.A. Bailey, S.Y.F.G. Dillak, S. Sembiring and Y.L. Henuk ..................................... 335 – 341

11. Ovulation and oviposition patterns in quail (Coturnix Coturnix Japonica)
S.Y.F.G. Dillak, A. Pigawahi, and Y.L. Henuk ...................................................... 342 – 345

12. Evaluation of tofu waste treated with fermentation and enzyme supplementation in broiler chickens
B. Sundu, Baharuddin and M. Basri ................................................................. 346 – 349

13. Influence of grit on performance of local chicken under intensive management system
Jublin Franzina Bale-Therik, Cytske Sabuna ............................................................. 350 - 353

14. The growth and productivity of selected kampung chicken
Heti Resnawati and Tike Sartika ........................................................................... 354 – 357

15. Effect of divergent selection body weight to egg production during the six generation and GHI gene polymorphism quail (Coturnix coturnix japonica)
Ning Setiati, J.H.P. Sidadolog, T. Hartatik and T. Yuwanta ........................................ 358 – 363

16. Feeding management evaluation of duck farmer group in Brebes
Heru Sasongko ...................................................................................................... 364 – 367

17. Heterosis and combining ability for body weight and feed conversion in four genetic groups of native chicken
Franky M.S. Telupere ............................................................................................ 368 – 373

18. The implementation of forced molting technology on rejected laying hens for the people discharged from employment (a case study at Duwet Village, Klaten, Indonesia)
Ali Mursyid Wahyu Mulyono, Sri Hartati, Ahimsa Kandi Sariri, and Engkus Ainul Yakin ................................................................. 374 – 379

19. Growth performance of Maleo birds (Macrocephalon maleo) by Means of feeding control in the captivity
Hafsaah, Tri Yuwanta, and Kustono ..................................................................... 380 - 384

20. Egg production and quality of Kedu chicken based on plumage color that reared intensively
Ismoyowati, Dadang Mulyadi Saleh, Rosidi .......................................................... 385 – 390

21. Effect of indigenous lactic acid bacteria probiotics on broiler performance
Sri Harimurti, Nasroedin, Endang Sutriswati Rahayu, Kurniasih ..................................... 391 - 394
22. Effects of zinc supplementation on laying performance of hens
   O.M.O. Idowu ................................................................. 395 – 397

23. Effect of different level of rice polishing in combination with phytase and acidifier on
   performance and shell quality in layer chickens
   Bayu Sesarahardian, Osfar Sjofjan and Eko Widodo .............................................. 398 - 402

PART II

Livestock Production

1. Exterior characteristics of Kejobong goats kept by farmers
   I Gede Suparta Budisatria, Panjono, Ali Agus, Lies Mira Yusiat, and Sumadi ....... 403 – 410

2. The effect of goat-sharing system on the performance of farmer groups raising etawah
   cross bred goats – a case study in ‘Sukorejo’, Girikerto, Turi, Sleman
   Yuni Suranjndiah, Kunstmantah, and E. R. Orskov ........................................... 411 – 414

3. Growth and carcass production of Ongole grade cattle and Simmental Ongole
   crossbred cattle growing in a feedlot system
   Mateus da Cruz de Carvalho, Nonno Ngadiyono, and Soeparno ....................... 415 - 422

4. Available herbage sustainability under soil and water conservation for development of
   small ruminants
   Sutarno, Sumarsono, Widiyati Slamet, Didik Wisnu Widjajanto ......................... 423 – 426

5. A study on some aspects of equine husbandry in the Punjab-Pakistan
   Arshade Iqbal, Asif Hameed, M. Younas, Bakht B. Khan and S.A. Bhatti .............. 427 – 432

6. Feeding strategies to increase growth of early weaned Bali calves in East Java

7. Response of brahman crossbred cows and their calves kept under semi-intensive and
   fed them on local-fodder supplement In east Sumba Regency, East Nusa Tenggara
   Province

8. The relationship between heart-chest girth, body length and shoulder height, and
   liveweight in Indonesian goats
   Asmuddin Natsir, Mawardi A. Asja, Nasrullah, Yusmasari, A. Nurhayu, Peter
   Murray, and Roy Murray-Prior ................................................................. 441 – 445

9. Growth performance of Ongole grade (Peranakan Ongole) cattle in Indonesia
   Budi Haryanto and Dicky Pamungkas .............................................................. 446 - 451

10. Growth of carcass and carcass component of different slaughter weight of local ram

11. Postpartum productivity of Simmental-Ongole crossed cows of the first generation
    compared to Ongole crossed cows kept by farmers
    E.Baliarti, W.T.H.M. Christoffor, and Soenardi ............................................. 455 - 459
The effect of supplementation of different lysine sources on the performance of weaned pigs from 4 up to 10 weeks of age
Risel Diana H. Likadja ................................................................. 460 – 463

Effect of fiber source on the performance of weaned pigs from 4 up to 10 weeks of age
Johannis Ly and Risel D.H. Likadja .......................................... 464 – 467

Influence the improvement of cattle feedlot production system to increase the welfare of feedlot farmers group in Indonesia through the implementation of integrated sustainability farming system
Joko Riyanto, Susi Dwi Widyawati, and Wara Pratitii .......................... 468 – 473

Breeding Bos sondaicus d’alton cattle in eastern Indonesia: cattle growth
Totok B. Julianto, Tanda Panjaitan, Geoffrey Fordyce, and Dennis Poppi .................. 474 – 477

Breeding Bos javanicus d’Alton cattle in eastern Indonesia cattle control, diets, draught use and feeding
Tanda Panjaitan, Geoffrey Fordyce, Dennis Poppi .............................. 478 – 482

Breeding Bos javanicus d’Alton cattle in eastern Indonesia: Monitoring village cattle
Dennis Poppi, Tanda Panjaitan, Dahanuddin, and Geoffrey Fordyce .................. 483 – 487

Application of non linear models in estimating growth curves of body weight and sizes of Holstein-Friesian female cattle
Nia Kurniawan, and Anneke Anggraeni ........................................... 488 – 496

Blood lipid status of “Jawa Ekor Kurus” sheep supplemented by protected kapok seed oil

Diversity on the exterior performance of crossbreed cattle kept by farmers in central java

Alternative control for endoparasites infection in goats by feeding fresh matured and immature leaves of terminalia catappa
Mohd Azrul Lokman, and Mohd Effendy Abd. Wahid ............................. 509 – 514

Growth of nine month old male buffalo calves as affected by different crude protein and energy concentrations
M. Sarwar, M. A. Shahzad, N.A.Tauqir, and M. Nisa .......................... 515 – 520

Performance of lactating buffaloes as affected by varying concentrations of essential amino acids

Animal Physiology, Reproduction, and Genetics

1. Seasonal investigation of serum magnesium concentration in native cattle at Western Azerbaijan Province, Iran
M.R. Vailiu and A.R. Rotfl .............................................................. 527 – 530

2. Detection of Toxoplasma gondii based on sequence r529 and sag1 gene probe
Asmarani Kusumawati, Harto Widodo, Nafratilova Septiana, and Sri Hartati ........ 531 – 534

3. Reproductive performance of dairy cows in Yogyakarta Province based on balanced ration given
Ahmad Pramono, Kustono, and hari Hartadi ....................................... 535 – 540

xiii
4. Breeding programme development of Bali cattle at P3Bali
   Andoyo Supriyanto, Luqman hakim, Suyadi, and Ismudiono ........................................ 541 - 546

5. Friesian holstein imported cows: physiological character and blood composition based on altitude difference
   Ratna Dewi Mundingsari, Adiarto, and Soenarjo Keman .................................................. 547 – 551

6. Breeding value of Friesian Holstein bulls in PT. Naksara Kejora Rowoseneng, Temanggung, Central Java
   Hasyim Mulyadi, Indrawati Mei P., and RR. Mahardika N.P ............................................. 552 – 555

7. Genetic potency of weaning weight of boerawa F1, backcross 1, and backcross 2 does at breeding centre, Tanggamus Regency, Lampung Province
   Sulastri ............................................................................................................................. 556 – 560

8. Distribution of population and production estimate of some cattle breeds at Yogyakarta Province, Indonesia
   Sumadi, Tety Hartatik, and Sulastri .................................................................................. 561 – 564

9. In vitro fresh sperm preparation for maintaining sperm viability at storage temperature of 14°C using tannin supplementation of lamtoro leaves
   Mirajuddin, Kustono, Ismaya, and A. Budiyanto .................................................................. 565 – 571

10. Phenotype and phylogenetic studies of local cattle in pacitan district, East Java, Indonesia
    Muhammad Cahyadi, and Tety Hartatik ............................................................................. 572 – 577

11. The exploration of genetic characteristics on Madura cattle

12. Breeding Bos javanicus d’Alton cattle in Eastern Indonesia: Cattle reproduction
    Geoffry Fordyce, Tanda Panjaitan, Totok B. Julianto, Eliza Kurtz, and Dennis Poppi .............. 585 - 589

13. Improvement quality of Bligon goat sperm trough separation by albumen
    Sigit Bintara, Soenarjo Keman, Sumadi, and Ali Agus ....................................................... 590 – 594

14. Correlation between plasma progesterone concentrations and fecal Progestins during the estrus cycle of Kedah Kelantan cows
    ............................................................................................................................... 595 – 598

15. Effect of PGF2α, or CIDR on ovarian follicular development during estrous cycle in goats
    Muhammad Modu Bukar, Rosnina Yusoff, Abd Wahid Haron, Gurmeet Kaur Dhaliwal, Mohammed Ariff Omar, Nur Husien Yimer, Mohd Azam Khan Goriman Khan .......................................................... 599 – 602

16. The use of frozen semen of Holstein-Friesian bulls with the BB genotype of the kappa casein gene in Indonesia
    A. Anggraeni, C. Sumantri, and E. Andreas ........................................................................ 603 – 608

17. Effect of haylage made of kume grass standinghay fermented with liquid palm sugar and local chicken manure on semen quality and scrotum circumference of male local goat
    Henderiana L.L. Belli and Nathan G.F. Katipan ................................................................. 609 – 613

18. The early identification of twinning trait genes on Indonesian local beef cattle
    Aryogi, Endang Baliarti, Sumadi, and Kustono ................................................................... 614 - 622
19. Effect of bulls on pregnancy rate of estrous synchronized Brangus cows
A. Malik, H. Wahid, Y. Rosmina, A. Kasim, and M. Sabri ........................................... 623 – 626

20. Analysis of Butyrophilin gene polymorphism in buffalo population in Khuzestan Province by PCR-RFLP Technique
Begi Nassiri, M. T. Mozafari, K. N. T. Hartatik, Fayazi, J. and Mirzadeh, K ............... 627 – 630

Technology of Animal Products

1. The development of ripened cheese containing lactic acid bacteria: the effect on chemical composition, acid production and sensory value
Tridjoko Wisnu Murti ........................................................................................................ 631 – 637

2. The restructured of local beef of low quality with different binders, fat emulsifiers and fortification with vitamin a in beef burger
Setiyono and Soeparno .................................................................................................. 638 – 643

3. The using of extract rabbits stomachs in the making goat milk cheese ripened with Lactobacillus Acidophilus
Inda Dewata Sari, Nuriyani and Indratiningsih ................................................................ 644 – 648

4. Effect of broiler age and extraction temperature on characteristic chicken feet skin gelatin
Muhammad Taufik, Suharjono Triatmojo, Yuny Erwanto, Umar Santoso ................. 649 – 656

5. Quality changes of burger from vegetable, wheat flour, rice flour with fat emulsion during frozen storage

6. Polymerization of meat and Tempeh protein using transglutaminase and their potency as an antihypertency and antioxidant agent
Yuny Erwanto, Jamhari dan Rusman .......................................................................... 663 – 670

7. The application of local dahlia tuber (Dahlia pinnata L.) as prebiotics for improving viability of probiotics Bifidobacterium bifidum in yoghurt
Widodo, Nosa Septiana Anindita, Endang Wahyuni, and Indratiningsih ................. 671 - 676

Extension, Community Development and Agribusiness

1. Elephant Camps and their impacts to community: Case study in Keud Chang, Chiang Mai Province, Thailand
Weerapon Thongma and Budi Guntoro ....................................................................... 677 – 682

2. Soft technology innovation for farmer empowerment to bring about practice change in an agricultural r&d project: lesson learnt from Eastern Indonesia
Nurul Hilmati, Elske van de Fliert, Medo Kote, Debora Kana Hau, Toni Basuki .... 683 – 690

3. The effects of dairy cattle ownership and farmers’ demography factors on the evacuation moving farmers’ behavior at Merapi volcano area (case study at Kaliadem Sub Village, Yogyakarta, Indonesia)
Siti Andarwati and F. Trisakti Haryadi ..................................................................... 691 – 694
4. *Farmers' profile and exterior characteristic of female Moa Buffaloes in Moa Island, Maluku Province*  
Justhinnus Pipiana, Endang Baliarti, and I Gede Suparta Budisatria ................................. 695 – 701

5. Economic analysis of on-farm feeding strategies to increase post-weaning live weight gain of Bali calves  
Atien Priyanti, Simon Quigley, Marsetyo, Dicky Pamungkas, Dahanuddin, Esnawan Budisantoso, and Dennis Poppi ................................. 702 – 708

6. The role of livestock service in order to cattle agribusiness development in regency of Kupang  
Maurinus Wilhelmus Gili Tibo .................................................................................. 709 – 716

7. Factors with the purchase of meat by consumers in Makassar, Sulawesi  
Nasrullah, Yusmasari, A. Nurhayu, Asmuddin Natsir, Mawardi A. Asja, Roy Murray-Prior, and Peter Murray .................................................. 717 – 724

8. Goat supply from Enrekang, South Sulawesi to East Kalimantan: a long and winding road  
Mawardi A. Asja, Asmuddin Natsir, Roy Murray-Prior, Peter Murray, Nasrullah, Yusmasari, and A. Nurhayu .................................................. 725 – 732

9. Goat meat consumption in Makassar, Sulawesi: Important for religious and cultural ceremonies, but many consider it a health risk  
Roy Murray-Prior, Asmuddin Natsir, Mawardi A. Asja, Nasrullah, Yusmasari, A. Nurhayu, and Peter Murray .................................................. 733 – 740

10. Marketing practices of smallholder beef cattle producers in east java  

11. Empowerment of goat farming: Lessons learnt from the development of goat farming group of Peranakan Etawah Gumelar Banyumas  
Akhmad Sodiq .................................................................................................. 747 – 752

12. Performance of credit program to small dairy cattle development in Indonesia  
Rini Widiati .................................................................................................. 753 – 758

13. Analysis of demand of broiler meat in Central Java  
Nurdayati, Sudi Nurtini, Masyhuri, and Rini Widiati .............................................. 759 – 762

14. Decision making model analysis of technology adoption: empirical study on milk pasteurization retailer behavior  
Januar Tri Sukarna, Suci Paramitasari Syahlani, and Ahmadi ........................................ 763 – 766

15. An education management model based on cognitive learning for small dairy farmers in the tropics  
Viriya Munprasert, Phahol Sakkatat, Varaporn Punyavadee, Siriporn Kiratikarnkul and Dumrong Leenanuruksa ............................................. 767 – 770

16. Participation of women farmers on beef cattle farming management in Pandan Mulyo Group, Bantul, Yogyakarta  
Ida Wulandari, Budi Gunboro, and Endang Sulastrri .................................................. 771 – 777

17. The sources of dairy cows and concentrate feed among the dairy farmers in Sleman Regency, Yogyakarta

INSTRUCTIONS TO AUTHORS
The Sources of dairy cows and concentrate feed among the dairy farmers in Sleman Regency, Daerah Istimewa Yogyakarta

Endang Sulastri¹ and Budi Gunarto

Faculty of Animal Science, Universitas Gadjah Mada, Yogyakarta, Indonesia

ABSTRACT: The sources of dairy cows and concentrate feed are still becoming the problems in dairy farming. The objectives of this research are to evaluate the sources of dairy cows and concentrate feed among the dairy farmers in Sleman Regency, Daerah Istimewa Yogyakarta. 88 dairy households were interviewed to get the information related with the objectives. 324 dairy cows, owned by the 88 dairy farmers, were evaluated to grasp the sources of them. The results show that the cooperative is the main sources of dairy cows and concentrate feed. More than 60% of dairy cows in the study area are provided the cooperative and more than 70% of dairy farmers prefer to get the dairy cows from the cooperative. The main of the reason that the cooperative becomes the main sources of dairy cows and concentrate feed is that the cooperative allows the dairy farmers to pay the dairy cows and concentrate feed by credit system.

Key words: Source of dairy cows, sources of concentrate feed

INTRODUCTION

In Indonesia, the need to develop the dairy farming is not only an economic process to meet the domestic demand for milk but is also in line with government objectives to increase the farmers income; to create employment opportunities; to increase foreign exchange earning; and to improve the nutritional status of the people. Dairy development is expected to reduce the milk and milk product import and lead to export of processed milk in those cases when the domestic production is high (Riethmuller and Smith, 1999).

Thus, the dairy farming, which can play a key role in improving socio economic status of large percentage of the rural people, has a good scope for development in Indonesia. Unfortunately, most of dairy farmers lack capital proper technology to conduct the dairy farming individually (Sulastri, 2004).

Indonesia dairy farming is based on small farmers. Dairy cows holding is small, with most farmers having three to four heads of dairy cows. Erwidodo and Hasan (1993) mentioned that dairy farming is based on confined rearing of dairy cows with forage grasses being gathered from outside of farm in a “cut” and “carry” system. Concentrate is given to the dairy cows as the supplement in order to increase the milk production.

According to Directorate General of Livestock (2002), one important reason for the low domestic milk production is the fact that the number of dairy cows is low and the animal feed given to the dairy cows is of poor quality. Due to the lack of capital, dairy farmers have some difficulties to increase the number of dairy cow holding and the quality of feed. The sources of dairy cows and feed are always considered as one the problem in dairy farming development. In order to evaluate the sources of dairy cows and concentrate feed among the dairy farmers, the research was done in July, 2009.

MATERIALS AND METHODS

To achieve the objectives, the research was undertaken in area of Warga Mulya Dairy Cooperative, Sleman Regency, Daerah Istimewa Yogyakarta. 88 of 1,133 dairy households were interviewed through a structured questionnaire, on site of observation. The dairy households were interviewed about the sources of their dairy cows and concentrate. The sources of 324 dairy cows that owned by

¹ Corresponding author: endangs@ugm.ac.id
the farmers and concentrate were evaluated. The collected data were both qualitative and quantitative. The data were tabulated according to the objectives of the research.

RESULTS AND DISCUSSION

Dairy Cows Sources

The farmers raise dairy cows from several sources. Table 1 shows that more than 61% of dairy cows came from the cooperative. On the other hand, the farmers also produce dairy cows in their farm by artificial insemination. Out of 324 cows surveyed, more than half (199 cows) was provided by cooperative, about one fifth (64 cows) was produced in self farm and one sixth (55 cows) was come from middle man and very few was from gaduh system.

Table 1 also shows the important role of cooperative in the dairy cows provision. The cooperative has the calf raising unit to fulfill the need of replacing all and non productive dairy cows and maintain the cow population. The new born calf owned by the breeder is purchased by the cooperative and raised in the calf raising unit and sold or credited to farmers after it is grown up and pregnant. It helps the dairy farmers in reducing the capital constraint on the dairy farming.

Note:
- Farm breed, dairy cows are produced in self farm by artificial insemination
- Cooperative, dairy cows are provided by the cooperative
- Middle man, dairy cows come from the other cooperative of East Java, Central Java and West Java through middle man.
- Gaduh, the system in which the farmer raises others’ dairy cows on profit sharing basis

Some farmers do not sell their female calves but they raise them on their own farm. This is a good sign in dairy development in regard to the fact that the farmers want to raise good dairy cows from calf because they know well the record from the beginning. Due to the limitation of land and lack of time, farmers buy heifer from the cooperative. There are some advantages of buying a heifer from the cooperative, these are: 1) the cooperative gives a guarantee of selling pregnant only, and 2) the farmers can buy the heifer by credit system and they can pay by installment with milk and/or calves.

In the heifer provision, the cooperative has problem that the cooperative was not able to fulfill the demand of heifers. To fulfill the heifers, the farmers buy from East Java, Central Java and West Java through middle man. Gaduh system was very common in the study area, even the number was few.

Sources of Concentrate Feed

The basic dairy cow feeding system is grass with concentrate supplement. Concentrate area essential part of ration in addition to dry matter roughages to increase the capacity of milk production per cow. To fulfill the needs of concentrate, out of 88 farmers, 62 farmers (70.5%) use the cooperative concentrate, 9 farmers (10.2%) use the own formulated concentrate as well as 17 farmers (19.3%) use both the cooperative and own formulated concentrate.

The cooperative gives loan to the farmers for buying dairy cows and concentrate feed on the condition of regular supply of milk to the cooperative. It determines that the payback period of loan should be 18 month to be paid daily installment from the sale of milk (10% of its milk produce).
Some farmers mentioned that the cooperative credit for buying concentrate and dairy cows helps them free from extortionate usury and the *ijon system*. Usually, the small farmers pawned their rice fields or their *pekaran* (garden) that produce coconuts (*Cocos nucifera* L.), salacia (*Salacca edulis*), mangoes (*mangifera indica* L.), and so on, for getting credit from the *tukang ijon* (money lender). As a result, even before the crops on the field have ripened, their ownership has already fallen into the hands of the *tukang ijon*. By means of the cooperative credit, an attempt has been made to free the members from this intolerable extortion and to prevent those who were free from their debts from being ensnared once more by the *tukang ijon*.
